

NOVELTY OF THE INVENTION

Having described the present invention, it is considered a novelty and as a result it is claimed as
5 property the following:

CLAIMS

1. A pharmaceutical composition, comprised of a non-steroidal anti-inflammatory and an opiate analgesic in combination with colloidal silicate dioxide, sodium
10 glycolate, lactose, microcrystalline cellulose, magnesium estearate and other recipients if necessary.

2. A pharmaceutical composition according to claim 1, wherein the non-steroidal anti-inflammatory is ketorolac tromethamine and the opiate analgesic is
15 tramadol hydrochloride.

3. A pharmaceutical composition according to claim 1, wherein the ketorolac tromethamine is present in the composition in a range of 0.0010 g to 0.1000 g and the tramadol hydrochloride is present in a range of
20 0.0010 g to 0.2000 g.

4. A pharmaceutical composition according to claim 1, wherein the ketorolaco tromethamine is present in the composition in a range of 0.0010 g to 0.1000 g and the tramadol hydrochloride is present at a range of

0.0010 g to 0.2000 g, the colloidal silicate dioxide is present in a range of 0.00010g to 0.02000g, the sodium glycolato starch is present in a range of 0.0010g to 0.2000g, the lactose is present in a range of 0.0100g to 0.5000g, the microcrystalline cellulose is present in a range of 0.0100g to 0.5000g, the magnesium stearate is present at a proportion of 0.0001g to 0.02000g, other recipients can be present at a proportion of 0.0001g to 1.000g.

10 5. A pharmaceutical composition according to claim 1, wherein it is in a capsule form.

6. A procedure for the elaboration of a composition according to claim 1, wherein it is comprised of the following steps:

15 a) Mix the ketorolac tromethanine, the colloidal silicate dioxide, the tramadol hydrochloride, sodium glycolate starch, the lactose, the microcrystalline cellulose, the magnesium stearate and other recipients if necessary ; b) analyze the powdered mix; c) proceed to encapsuling and conditioning the mix.

20

7. The use of the composition according to claims 1 to 6, for the pain treatment.
